

Softened & Filtered Water Around The Clock

SOFTENERS

Master Water Satin Series 2.0 Twin water softeners provide uninterrupted service of softened and treated water 24 hours a day, seven days a week. A twin tank softener also provides a very efficient way to treat your water. With a second tank always ready, the system can use 100% of its softening capacity—unlike single tank softeners that will regenerate with capacity still remaining.

System Features & Benefits:

- **Twin Alternating System** automatically switches from the exhausted tank to the standby tank when system capacity has been reached providing 24/7 softened water
- **Treated Water Regeneration** maximizes the life of the media by regenerating with softened water from the secondary tank
- **Service Alarms:** Based on time and/or gallons to optimize maintenance schedules
- **Twin Systems Are Ideal For** Residential Homes, C-Stores, Restaurants and Bars, Power Washing, 24-Hour Laundromats, R.O. Pretreatment, Car Washes, and Boiler Feeds

Softened & Filtered Water Around The Clock

SOFTENERS

Featuring The Vortech® Plate

Vortech Technology creates fluidity of the media bed and extends contaminant removal capacity — meaning fewer regenerations and a significant reduction in water usage.

The Meter

The meter is designed to measure water usage with extreme accuracy. With its stainless steel shaft and non-corrosive blade material, the meter provides worry-free performance and accounts for high operating efficiencies.

Featured Media

Resin

- Hardness reduction
- Stops energy drain in water heaters
- Softens household water using minimal salt and water

	Satin Series 2.0 Twin Water Softener		
	1044	1054	1354
Hardness	75 gpg	100 gpg	100 gpg
Iron (red stains)	1 ppm		
Manganese	.5 ppm*		
Applications	Softens Water <ul style="list-style-type: none"> • Reduces hardness • Capable of reducing low levels of dissolved (ferrous) iron & manganese * Manganese reduction is highly dependent on water conditions
